Aisha Gaines has always had a passion for helping entrepreneurs and small business owners grow their businesses ethically and financially. Her first entrepreneur gig started when she was 12 years old. Her grandfather was the treasurer of St. James CME church in Salinas, CA. He offered her a skill that she now inspires others with. Fred D. Holt offered her first job to balance the books, which included the accuracy incoming of money aka accounts receivable. This included counting the money from offerings, tithes, donation and much more. Accuracy was everything to her and making sure that the books balanced. Knowing that she was able to show her grandfather that she can do it was the best feeling in the world.

This opportunity helped her re-live her happiness of helping our youth and adults learn the importance of building a positive relationship with money also known as one's finance. Growing up in Oakland, California Aisha understood the importance of education and financial literacy/wealth.

Influenced by the women in her immediate circle, grandparents, parents and many other powerful influences, she discovered her calling in leadership development and financial wealth building.

After much success in corporate finance world, Aisha is currently the Chief Financial Officer at a financial wealth building company, Upscale Tax Professionals. Aisha is also a serial entrepreneur, assisting businesses with team building, tax planning, tax education and financial planning. Aisha has mastered the art of teaching companies the core fundamentals needed for wealth planning and business growth.

Aisha's latest endeavor is Aisha's Mobile Notary, a mobile notary company that travels throughout the Great Bay Area. She is the CEO of Aisha's Mobile Notary. Aisha is CA licensed, bonded and insured. She will guarantee accuracy and attention to detail in every signing. She certified by the National Notary Association, background screened and E&O insured allowing her to guarantee error-free service every time.

With several attributes in her portfolio, Aisha has mastered networking and connecting business owners across the United States. Understanding that financial education is key, and that Documents are notarized to deter fraud and to ensure proper execution. As a notary public she is committed to making sure that ALL signers are present, produced proper identification and that the documents are signed correctly.
